Follows the symbiosis of portable computers and wireless networks  
Addresses the convergence of mobility, computing and information organization, access and management  
Discusses nomadic computing, data management, software and hardware technologies, and mobile user services

The journal Mobile Networks and Applications reflects the emerging symbiosis of portable computers and wireless networks, addressing the convergence of mobility, computing and information organization, access and management. In its special issues, the journal places an equal emphasis on various areas of nomadic computing, data management, related software and hardware technologies, and mobile user services, alongside more 'classical' topics in wireless and mobile networking. The journal documents practical and theoretical results which make a

fundamental contribution.
