

ELEX 2117

Digital Techniques 2

Ed Casas

Jan 9, 2020

Course Under Construction

- Temporary Instructor:
 - Ed Casas, ecasas@bcit.ca, office: SW1-3061 (via 3059)
 - I found out I was doing this yesterday afternoon!
 - Expect a bit of initial confusion
 - You should have a permanent instructor in a couple of weeks
- Labs will start next week
 - First lab is review & measuring timing specifications
 - I may not have the lab available for you until your lab next week
- Course outline, including evaluation criteria will be made available next week

Questions for you

- Did you have a lecture on Tuesday?
- Do you have a Textbook? Which edition?
- Do you have your Digi 1 and Digi 2 parts kits?
- Is there anything on the ELEX 2117 Learning Hub site?
- Do you like “pop” (randomly scheduled) quizzes?

Chapter 5 – Latches and Flip-Flops

- We'll start where you left off in “Digi 1”: Chapter 5
- Note that the textbook's >1000 pages contains much legacy (no longer commonly used) material which I will try to skip.
- To start, I'll be using the authors' slides interspersed with my own comments.
