Comments
Ed is so smart but he is still able to explain the material so well no matter how complex these materials can be. I have a wonderful time listening to his lectures. Learning frames and different communication protocols of different layers in his point of view is different from what Ive heard before. Reading these things is so technical its so difficult to understand and like so out of this world. He makes it so easy. I also like the part where you have to answer sample questions every after discussion as Im kinesthetic too. Thanks Ed! Cheers!
Ed was very helpful both in lecture and lab. Very good instructor
Very organized, very good. :D
the most stress free learning environment course , learn a lot . Very organize , fair quiz ,
I was also your student from Digi 2, and I am always amazed with the way you help students in everything. Thanks Ed!
10/10
Explanations were clear and the documents are very good. It would be useful if there were more concrete examples of how these protocols and systems are used in real life. The lectures feel like a constant dump of information and sometimes I loose track. I would learn better if there was more interaction with the students and if there were a few more pauses for reflection or perhaps doing exercises individually before being shown how to do it. Labs were fun and the questions helped me learn key takeaways. Exam evaluations are fair.
