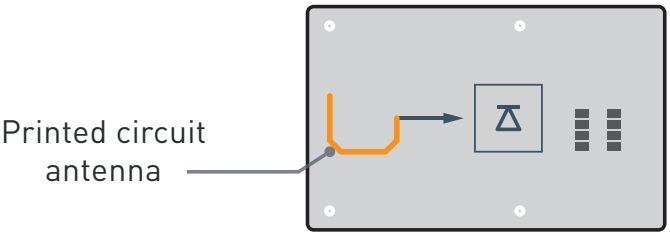
G04

RF Power Detector 300 MHz - 7 GHz



Applications

The LTC5530 detector is mainly used to measure the power of wireless communications (802.11a, 802.11b, 802.11g, 802.15, 802.16....)

Specifications

Antenna shape	U form
Antenna length	27 mm
Detector	LTC5530
Frequency	300 MHz to 7000 MHz
Unit	mV
Sensibility	30 mV

Example

Sony cybershot in wifi communication
